

Factsheet

Operational data governance

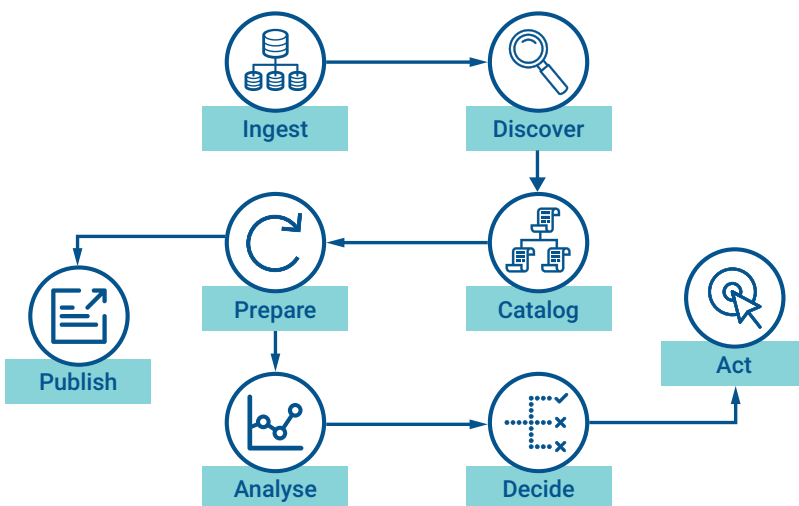

Solidatus is the only tool that enables true organization-wide understanding and control of data with its ground-breaking lineage-first approach.

Gain early success and set the foundation for sustainable data governance

Solidatus empowers organizations to design and implement operationally efficient and business-enabling data governance. It provides a rapid return on investment through enterprise-wide alignment, reducing costs and improving efficiency while demonstrating control.

Data management governance lifecycle

(Data catalog, data quality, MDM, lineage, auditing, security)

Go beyond basic governance by adding data dimensions including data quality, ownership, sourcing, privacy and authority – all visualized in context – and maintain control through both a business and IT lens.

**“ 100% Gartner reviews
'would recommend' Solidatus.**

Why Solidatus

- Trust your data**
 Make consistent and confident business decisions by having trust in the quality and providence of your data.
- Reduce compliance costs**
 Build proactive compliance frameworks. Reuse and leverage existing regulatory programmes such as GDPR and CCPA to reduce future compliance burdens and costs.
- Achieve scalable, collaborative data governance**
 Crowdsource knowledge, break down silos and leverage automation to seamlessly integrate sustainable data governance into the fabric of your organization.
- Establish organizational-wide understanding**
 Create a common language and context that brings with it the ability to accelerate and optimize data-driven decision making.

Features

Solving your data governance challenges

Gain confidence in your data

Solidatus builds end-to-end understanding faster than any platform available through fully documented lineage. Certainty of data origination can be obtained confirming only these data sources are being used, reducing or eliminating time-consuming reconciliations.

Demonstrate compliance

Solidatus enables organizations to quickly and sustainably catalog, classify and assess their data estate, giving a real time view of compliance both internally to policy, and externally to regulation, as well as providing a forward planning platform to manage organizational transformation.

Maintain control as change happens

Built from the ground up as a collaborative, flexible, audited, work flowed change-management platform, Solidatus tracks all change revisions, the people responsible for the change and allows users to see differences between revisions over time.

Eliminate data debt

Solidatus is technology-agnostic and can leverage existing software. It provides multiple connectors, importers and an open API to ingest and catalog metadata from multiple sources, helping to create and combine reusable building blocks to deliver holistic end-to-end data supply chains to solve multiple business challenges.

About Solidatus

Solidatus is an innovative data management technology company, empowering organizations to unlock the true business value behind their data. Our lineage-first technology enables organizations to connect and visualize data relationships across the enterprise, simplifying how they identify, access and understand them. Launched in 2017, Solidatus is the chosen data management tool for both the regulators and the regulated. Its clients and investors include top-tier global financial services brands such as Citi and HSBC, healthcare and retail organizations as well as government institutions. Solidatus has offices in the United Kingdom, the United States and Singapore. For more information, visit www.solidatus.com
